

TIME STUDY RESULTS

The National Wraparound Initiative (NWI) conducted a multi-state study to review the activity conducted by Wraparound facilitators practicing high fidelity Wraparound. The results of that study indicated that when Wraparound is conducted in accordance to the NWI model, Wraparound facilitators could bill on average 70 hours per month. Results are shown below.

Things to consider that were not accounted for:

Travel time for rural jurisdictions that new care coordinators don't get it right the first time and the tasks done with a new family may need to be repeated several times, and more than one crisis happens in a month with this population.

Note

Please note that the study was based on care coordinators working with 10 families, with 4 additional team members.

Tasks	Time Spent per month	Face to Face
Team Meetings	20	Y
set up for meeting	10	N
POC Completion	10	N
Meeting Minutes	10	N
